

New Order Manager

The new Order Manager will gradually replace the classic version as feature parity is reached. During this transition, the view each user sees is determined by their Order Manager roles:

- **order status** users see the new Order Manager
- **system administrator** users see the new Order Manager with a company selection dropdown
- **despatch advice and/or invoicing** users (but **without order status** role) see the classic version

Shipping and invoicing actions in the new Order Manager open the classic version in an embedded view, allowing users to complete these workflows without leaving the portal.
